

Qualifications Summary

Adaptable and fast-learning Full Stack Developer with experience in building responsive web applications using Laravel, React, and MySQL. Passionate about clean code, problem-solving, and delivering efficient digital solutions in collaborative development environments.

Full Stack Development:

- ◆ Develops full-stack web applications using Laravel, React, MySQL, HTML, modern CSS, and JavaScript.
- ◆ Builds responsive user interfaces and implements secure backend functionality with optimized database performance.

Frameworks & Libraries:

- ◆ Skilfully develops full-stack web applications using Laravel, React and component-based architecture.
- ◆ Integrates RESTful APIs, backend services and database operations to deliver efficient and maintainable solutions.

Problem-Solving & Debugging:

- ◆ Systematically identifies, analyses, and resolves bugs to ensure smooth application functionality.
- ◆ Logically approaches coding challenges with structured thinking and attention to detail.

Cross-Functional Collaboration & Teamwork:

- ◆ Proactively collaborates with cross-functional teams to deliver cohesive solutions.
- ◆ Effectively contributes in team environments, supporting agile workflows, code reviews, and shared project goals.

Technical Proficiencies

Platforms: Laravel | React

Tools & Databases: MySQL | phpMyAdmin | Git | GitHub | VS Code | Maps API | Weather API | RESTful APIs

Education & Credentials

Bachelors of Computer Science: CGPA:3.50

University of The Punjab, Gujranwala

HSSC in General Science: Grade: A+

Punjab College for Women, Gujranwala

SSC in Science: Grade: A

New Loretto House School, Gujranwala

Microsoft Office Specialist, Seal of Microsoft Certification Official

Google AI Essentials, Google

Academic Experience

Student, Bachelors of Computer Science

2022 – 2026

Key Project: Journey Junction

Developed CRUD operations for managing destinations, hotels, bookings, and blogs. Managed structured data using MySQL (phpMyAdmin) and ensured smooth system performance through testing and debugging.

- Built full-stack travel/tourism web application using Laravel (PHP), MySQL, React, HTML, CSS, JavaScript, and React Bootstrap.
- Designed and implemented a responsive UI for exploring destinations, blogs, and hotel listings.
- Integrated Maps API and Weather API for real-time location and weather updates.
- Developed secure authentication system for users, vendors, and admin.
- Implemented hotel search, filtering, and online booking functionality.
